

Account Manager Command-Line Interface User Manual

Starting the Program

Run "AccountManagerCLI\build\build.bat". A successful start should resemble Figure 1.

```
1: Add Account
2: Add Format
3: Print
0: Quit
```

Figure 1: main menu.

Adding Your Data

If you have not added a format before, follow the following procedure, otherwise type and enter "1".

New Account and Format Creation

- Step 1: type "2", press "enter".
 - Step 1.1: paste the website link the account is connected to.
 - Step 1.2: type and enter each header the website requires.
- Step 2: type "1", press "enter".
 - Step 2.1: paste the website link the account should be added for.
 - Step 2.1: follow the prompts which will be the template for the selected website.
